

KH80G

HYUNDAI WIA Horizontal Machining Center

Technical Leader

Resulting from years of experience, Hyundai WIA's KH80G features a 3 step geared spindle and rigid construction in order to deliver accurate machining and maximum productivity.

KH80G

[] : Option

Pallet Size	mm(in)	2-800×800 (2-31.5"×31.5")
Max. Load Capacity	kg(lb)	2-2,200 (2-4,850)
Spindle Taper	-	NT #50 [HSK-A100]
Spindle Speed	rpm	4,500 [6,000]
Spindle Output	kW(HP)	26/22 (34.9/29.5) [26/22 (34.9/29.5)]
No. of Tools	EA	40 [80, 120]
Travel(X/Y/Z)	mm(in)	1,250/1,000/850 (49.2"/39.4"/33.5")

Robust Machining Center with
Revolutionary Productivity

KH80G

- Best in class max. work size of $\varnothing 1,150(\varnothing 45.3")$ and 1,150mm($\varnothing 45.3")$ height
- Dual Contact Spindle for High Rigidity (OPTION)
- 3 Step Gear Main Spindles for Powerful Cutting
- Through Spindle Coolant for High Accuracy
- Shuttle Type APC
- Optimized Guide Ways on Each Axis
- Specially Designed Columns That Minimize Thermal Displacement

01

KH80G

Basic Features

Heavy Duty Cutting & Productivity
Horizontal Machining Center

01 Column Moving Structure

The column moving Z-axis enables precise machining of large-sized work and prevents overhang of table when loading or machining. The column width of 860mm(33.9") provides precise machining at any condition. Also, the thermally symmetrical column structure minimizes thermal displacement.

02

Spindle

By using ultra precision cylindrical roller bearings, fast acc/ deceleration of the main spindle is achieved.

The spindle head is designed to minimize thermal displacement of main spindle, and with the use of a hydraulic tool lock system, the machining stability has been increased.

03

Hybrid Type Slideways

KH80G applies 2 types of guideways. Sturdy box guideways on Y-axis for heavy loads, and LM Guideways on X/Z axis for better movement, providing ultimate travel ability.

Oil & Air Lubrication

Guideways are lubricated with both oil and air, When compared to conventional oil-only lubrication systems, cooling speed is improved.

Shuttle Type APC

Productivity is improved through shuttle type APC that makes large-sized workpiece machining easier.

04

Basic Features

Powerful Cutting Capability & Large Working Area

- ◎ **Spindle Output** (Max./Cont.) : 26/22 kW (34.9/29.5 HP)
- ◎ **Spindle Torque** (Max./Cont.) : 1,500/1,275 N·m (1,106.3/940.4 lbf·ft)
- ◎ **Travel** (X/Y/Z axis) : 1,250/1,000/850 mm (49.2"/39.4"/33.5")
- ◎ **Max. Load Capacity** : 2-2,200 kg (2-4,850 lb)

02
KH80G

Powerful Cutting Spindle

High Productivity Achieved
with High Rigidity and High Precision

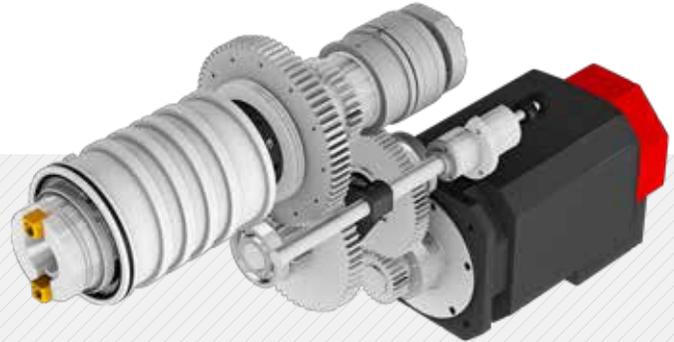

Highly Rigid Main Spindle Structure

Main spindle diameter of 100mm(3.9") helps maintain reliability during heavy duty cutting, while the 3-point contact roller bearing as well as angular contact bearing provide high rigidity.

Spindle oil cooling device is applied to minimize thermal displacement. This helps maintain precision during long hours of operation.

3 Step Geared Spindle

The KH80G is designed with a 3-step gear drive, which provides high torque at low rpm and stability at high rpm.

Tool Holders

BBT, CAT, HSK tool holders are applicable.

CAT **OPTION**

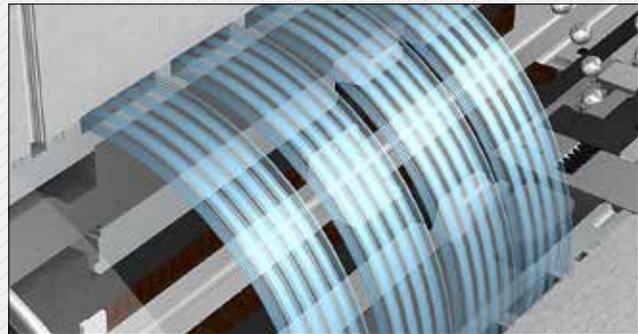

BT

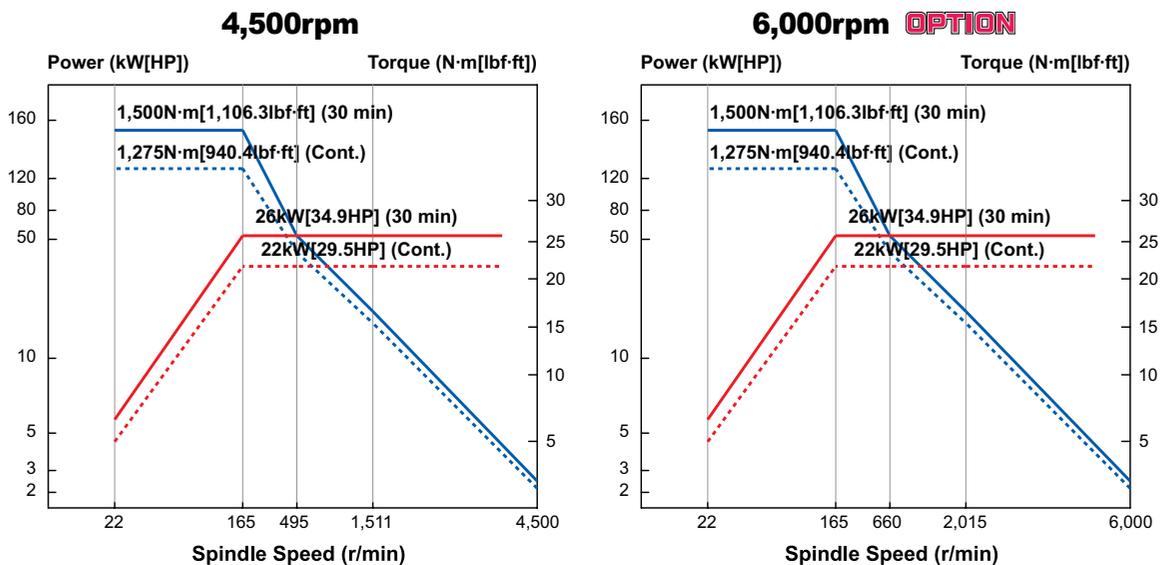

HSK **OPTION**

Spindle Cooling

Spindle temperature can be controlled by the use of a spindle oil chiller. This ensures constant oil temperature and minimizes thermal displacement.

Spindle Output/Torque Diagram

03

KH80G

Pallet

High Productivity Achieved
with High Rigidity and High Precision

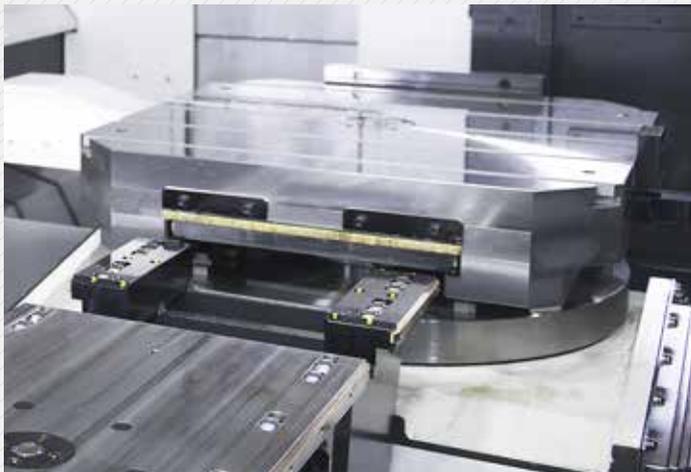

Shuttle Type APC

The KH80G is equipped with a shuttle type APC (Automatic Pallet Changer) as standard. The pallet can be rotated in the loading station for quick and easy load/unload of machined parts.

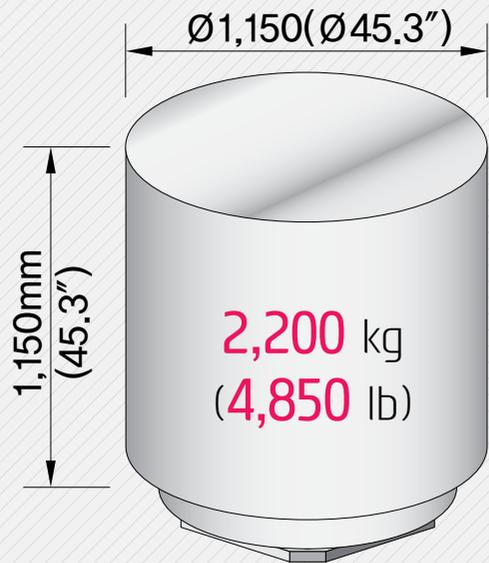

Peripheral Device

Table

Powerful clamping by clamping plate is suitable for heavy duty cutting. Precise indexing is possible with 1° index table which applies high precision couplings.

Work Area

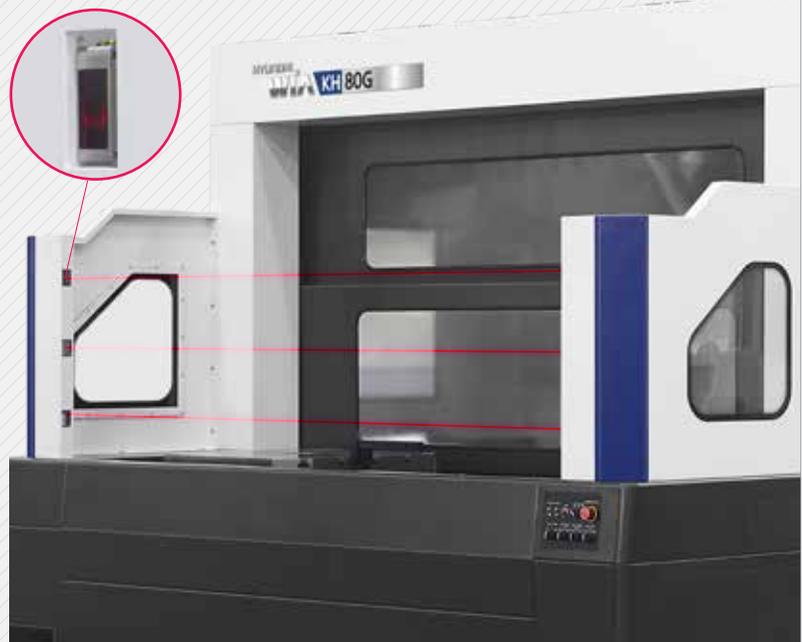

APC Safety Sensor

Safety sensors on APC covers detect the presence of operators near APC. When a contact is detected on the beam, APC automatically stops. This helps establish a safe work environment.

Enhanced Convenience of APC

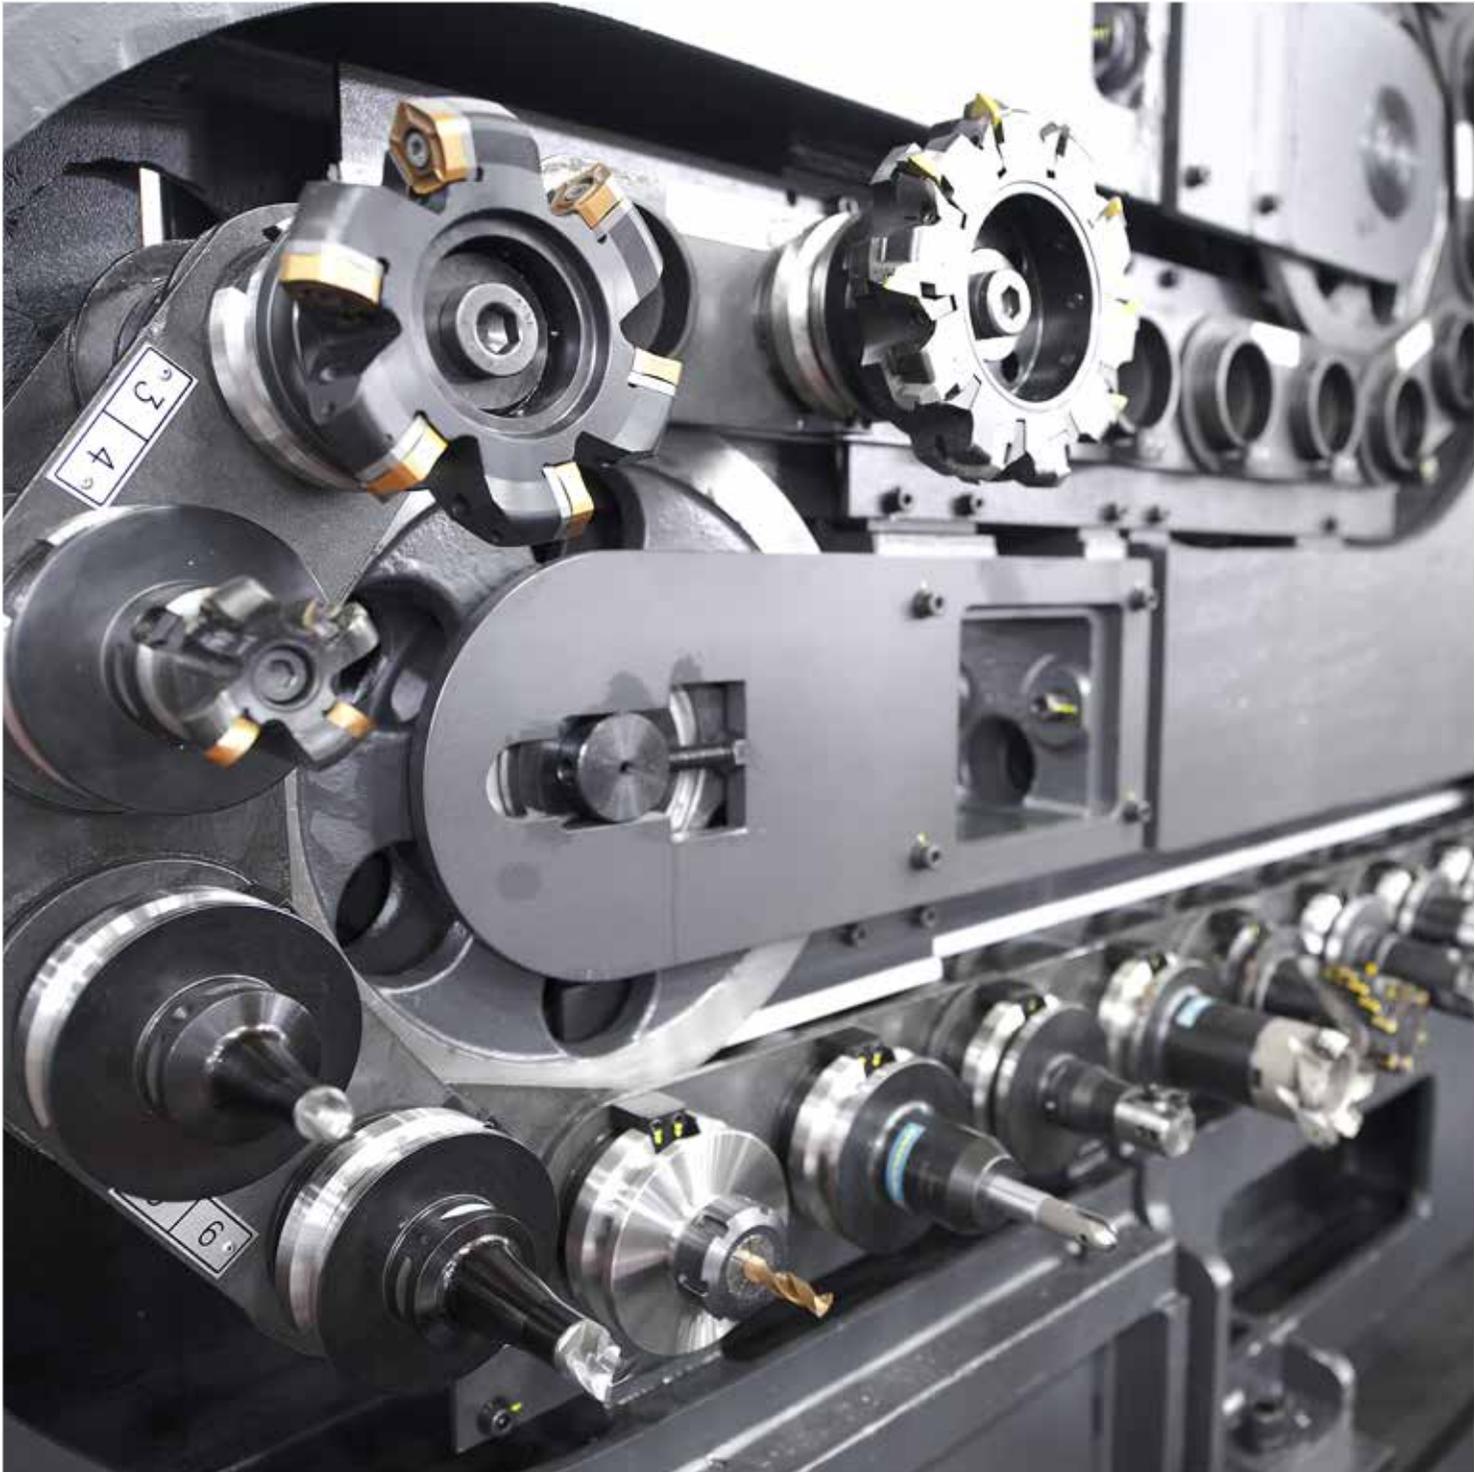

An additional control panel is provided for APC operating.

04
KH80G

Magazine & ATC

High Productivity Achieved
with High Rigidity and High Precision

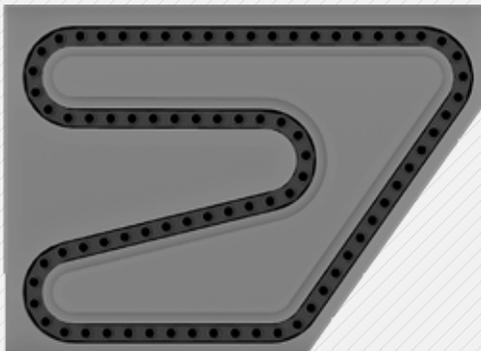

40 Tool

Magazine & ATC

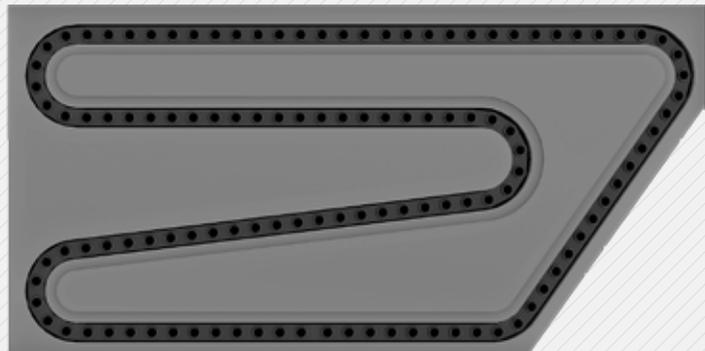

KH80G offers various tool magazines which expand the range of machining. Also, fixed address tool selection method increases convenience.

Machine Dimensions According to Magazine Selection

40 Tool : 5,510 mm (216.9") 80 Tool : 6,700 mm (263.8")
120 Tool : 8,125 mm (319.9")

80 Tool **OPTION**

120 Tool **OPTION**

ATC

Tool change time has been shortened to 3.5s (T-T) and this helps reduce non-cutting time.

T2 types of ATC cycles for standard tools (15kg[33lb]) and heavy tools(27kg[59.5lb]) increase convenience.

- **Std. Tool Weight :**
15 kg (33 lb)
- **Max. Tool Weight :**
27 kg (59.5 lb)

05
KH80G

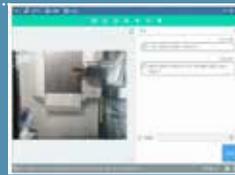

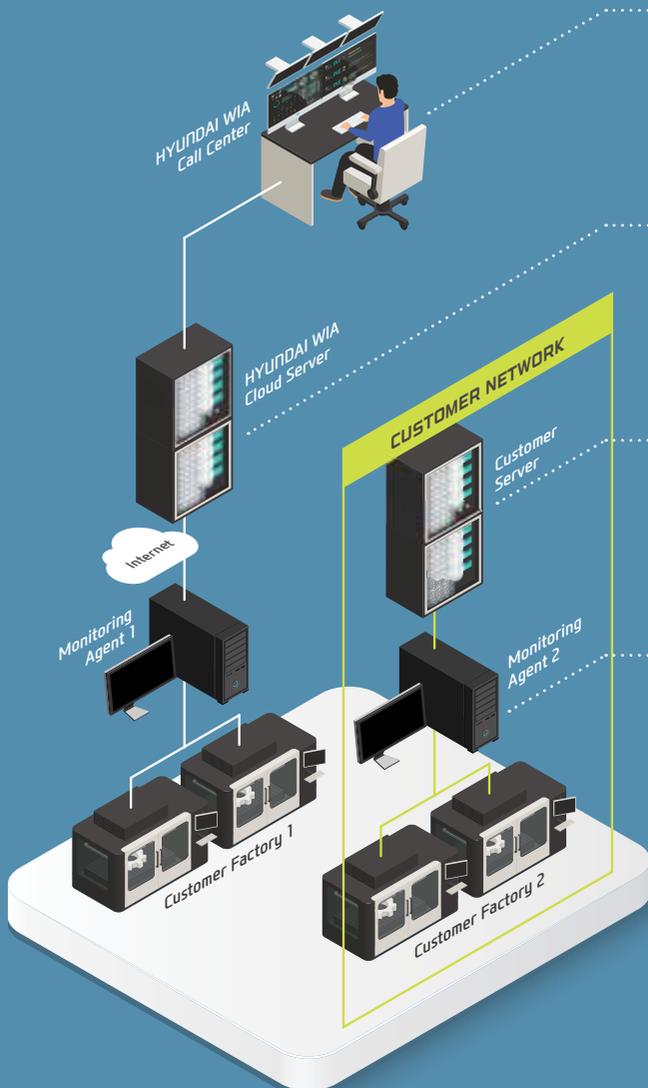

iRiS

HYUNDAI WIA
Smart Factory Solution
integrated Revolution of industrial Solution

iRiS is HYUNDAI WIA's Smart Factory Solution.

iRiS, HYUNDAI WIA's revolutionary smart factory solution, consists of **Smart Monitoring System** for integrated management of HYUNDAI WIA machines around the world, and the **Smart Machining System** with ease, quality control, productivity and safety of the operator in mind.

SMART MONITORING

HW-MMS Remote (Remote service based)

Hyundai Wia Call Center's remote diagnosis service provides a HMI/video diagnostic function.

HW-MMS Cloud (Cloud server based)

A cloud server-based equipment monitoring system for collecting and analyzing facility operation data.

HW-MMS Edge (Customer Server Based)

A customer server-based equipment monitoring system for collecting and analyzing facility operation data.

HW-MMS Collector (Machine data collector)

A dedicated program for collecting CNC data for MES/ERP.

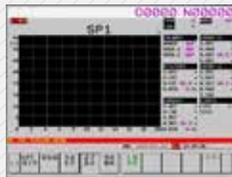

A brand new manufacturing machine by Hyundai Wia, HW-MMS is a unique software capable of monitoring the operation status of manufacturing machines in factories, a **smart solution** to improve manufacturing conditions of customers.

SMART MACHINING

HW-MCG
HYUNDAI WIA
Machine Guidance

Software that offers operation, maintenance, management monitoring and various user friendly features.

HW-TM
HYUNDAI WIA
Tool Monitoring

A tool monitoring software which analyzes the load of the spindle motor to determine and monitor possible damage of tools.

HW-MCS
HYUNDAI WIA Machining
Condition Selection

Software that automatically sets cutting and feeding parameters according to the machining types (speed, degree, quality)

HW-WARMUP
HYUNDAI WIA
WARMing Up

Warm-up software that measures main spindle halt and offers system warm-up time automatically.

HW-DPRO
HYUNDAI WIA
Dialogue PROGRAM

Software to create machining program easily and quickly through interactive operation

HW-TDC
HYUNDAI WIA Thermal
Displacement Compensation

Software that measures the changes in the external environment as well as heat emission during processing to help reduce thermal displacement.

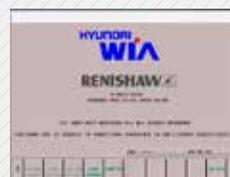

HW-AFC
HYUNDAI WIA
Adaptive Feed Control

Software that controls the feed automatically to maintain a certain working load to extend tool life as well as productivity.

HW-ESS
HYUNDAI WIA
Energy Saving System

An environmental friendly software that reduces the unnecessarily wasted standby power waiting for an operation.

RENISHAW GUI
Work / Tool Offset
Measurement

User-friendly GUI software for material coordinate system, tool length / diameter/breakage measurement (included in RENISHAW H/W set)

HW-eDNC
HYUNDAI WIA ethernet
Direct Numerical Control

This software allows transmission of NC data between PC and a machine's CNC. The processing programs can be managed on the PC through the ethernet or serial communication.

05

KH80G

User Convenience

Various Devices for User Convenience

Measuring Device

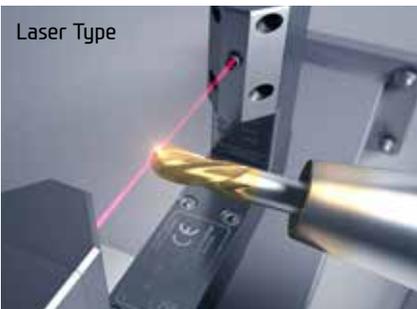

Work Measuring

Workpiece coordinate values can be set automatically using the optional spindle probe.

Tool Measuring

Tool lengths and diameters can be set automatically using the optional tool setter. This can also be used to monitor tool attrition and detect broken tools.

Precision Device

Linear Scale & Rotary Scale

Linear scale and rotary scale help process highly accurate products through precise positioning.

Hydraulic Device

Hydraulic Supply Unit

Instead of the standard hydraulic supply unit, an optional fixture unit can bring the pressure up to **100 bar (1,450 psi)**, maximizing the clamping force on the fixture.

Optional

6PPL

6PPL contains 5 buffer stations and a setup station as standard. Compared to conventional machines that feature APC (2 Pallets), 6PPL runs automatically for longer time. Also, machining various products is possible under a scheduled operation.

Cabin Screw Chip Conveyor (Standard)

Dual screw type chip conveyors are located at each side of the bed which makes it convenient to remove chips.

Chip Conveyor

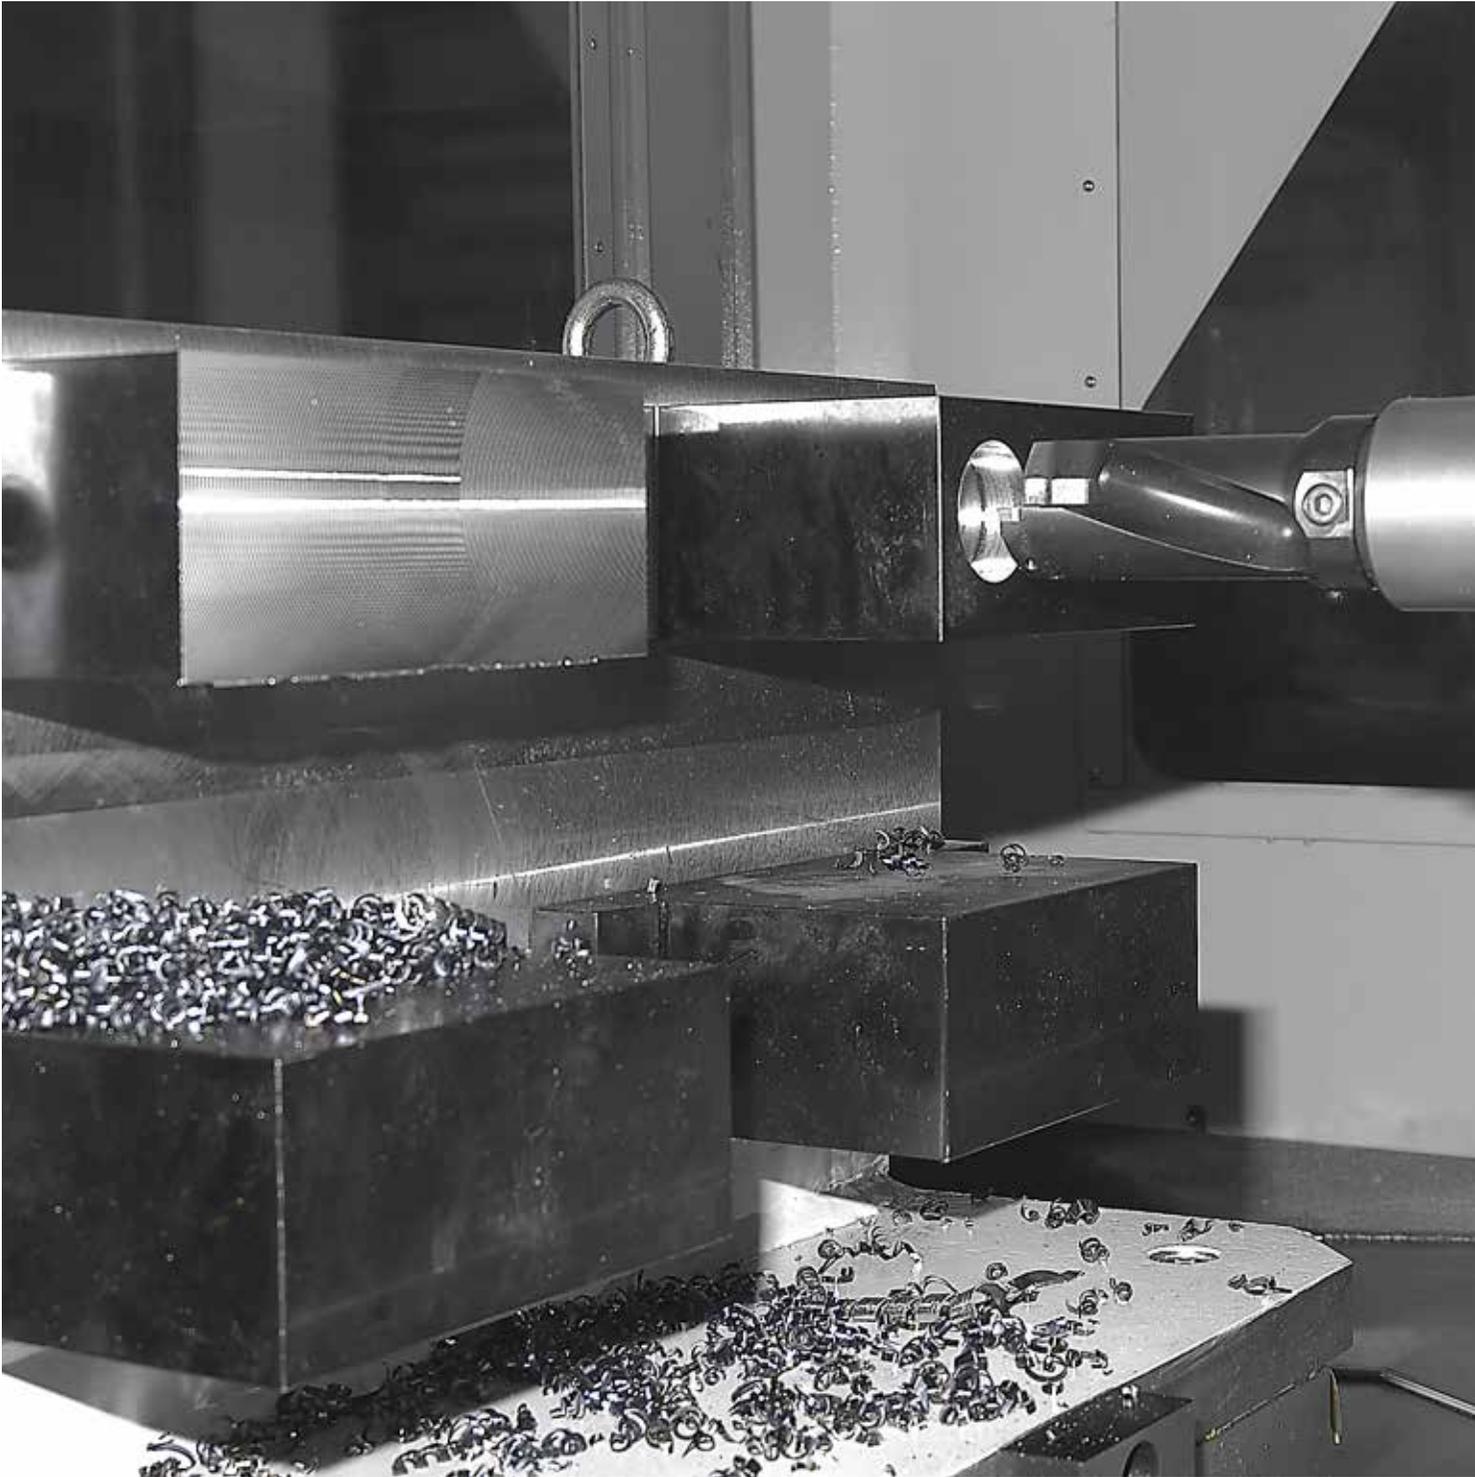

Timely and effective disposal of chips will enhance productivity as well as the working environment.

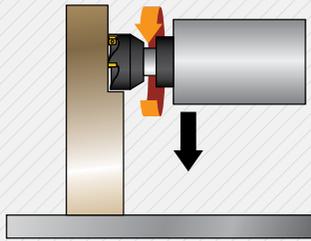

- **Hinge Belt Type** : Highly efficient when disposing a lot of chips. Capable of handling stringy chips. (Long Chip)
- **Scraper Type** : Convenient for shortly cut chips. (Short Chip)
- **Drum Filter Type** : Advantageous in precision, as the chips do not flow in to the coolant nozzle. (AL Chip)
