# HIGH RIGIDITY STRUCTURE FOR HEAVY DUTY CUTTING

## ALL-IN-ONE TYPE OF BED

### High Precision & Rigidity, One-Piece Structure

The L4000 Series features a 45° slant bed design which is developed through finite element analysis (FEA) to absorb vibration and minimize thermal displacement so as to maintain high stability.

## GUIDEWAY

### Box Guideway

With the mounting of box guideways on all axes, the machine offers excellent vibration absorption even against during heavy-duty cutting, enabling high-quality machining.

### Improved saddle rigidity

The contact area between the saddle and the cross-slide has been increased for high rigidity.

### Ball Screw

Large diameter ball screws with preloading prevent deformation due to heat. Also double-anchor support method improves rigidity.

**Rapid Traverse Rate (X/Z)** 16/20 m/min (623/787 ipm)

# HYUNDAI WIA ECO SYSTEM

## MQL (Minimal Quantity Lubrication)

The goal of this system is to spray only the amount of lubricant required to prevent heat and chip build up at the cutting tool or work piece face.

### Example of Turning Center Application

### Example of Etc.

Oil Skimmer

An oil skimmer can increase coolant and tool life by removing tramp oil contaminants.

Mist Collector

Mist Collector reduces the amount of smoke and oil mist in the air. This helps build a safe and comfortable working environment and improve durability.

Lubrication System

By applying lubricant only when the machines axis are moving lubrication consumption is reduced by compared to standard systems.

# HYUNDAI WIA ENERGY SAVING

## HW-ESS (HYUNDAI WIA Energy Saving System)

HYUNDAI WIA Machine tool provides the optimum power saving function that can easily save energy with an intuitive user interface.

1. **Machine-ready power saving function** : Put all servo motors and other motors into sleep mode when no control or operation is done for a set time
2. **Work light auto-off function** : The work light is turned off automatically when no control or operation is done for a set time
3. **Chip conveyor auto power saving** : Operation/non operation time (timer) can be set to save energy
4. **Auto Power-off** : Auto power off after ending the an operation after a period of time
5. **Eco function** : Machine ready sleep mode can be activated/de-activated from the controller panel
6. **Power consumption monitor** : Real time power consumption can be monitored through the OP screen
